

Back to School with Megan Book Drive

Project title: BacktoSchoolwithMegan.tha.tt

Event date: 30 August 2026

Project purpose:

Develop a dedicated landing portal for the Back to School with Megan Book Drive initiative in Mount St. George and Goodwood, Tobago. The portal will collect participant data, allow upload of each student's book list, connect to the existing THA database, and generate a unique THA ID for each registrant. It will also support resource allocation and collection tracking on the registration day and collection date.

Primary objective:

Create a clean, secure, and easy-to-use landing page that allows parents or guardians to register students, upload their book list as a PDF or Word document, and receive confirmation once the data has been captured. The portal should help administrators assess each student's needs, assign available physical resources, and track collection when items are handed over.

Core features required:

- Initiative-branded landing page.
- Registration form for guardian and dependent intake.
- Secure connection to the existing THA database.
- File upload function for book lists in PDF or Word format.
- Automated unique THA ID generation upon submission.
- Confirmation page or success message.
- Optional email or SMS acknowledgment.
- Internal admin access for monitoring, reporting, and reviewing uploaded documents.
- Resource assignment and collection tracking for physical items.
- Support for multiple dependents under one guardian application.

Suggested registration fields:

- Parent/guardian full name.
- Contact number.
- Email address.
- Home address/community.
- Number of dependents.
- Consent to data collection and participation.
- For each dependent:
 - Student full name.
 - School name.
 - Grade level.
 - Upload of book list document.
 - Notes on required items or special needs.

Technical requirements:

- Domain routing for BacktoSchoolwithMegan.tha.tt.
- HTTPS/SSL security.
- Backend integration with THA database.
- Server-side unique ID generation.
- Validation for required fields and duplicate entries.
- File upload support for PDF and Word documents.
- File size and file type restrictions.
- Secure storage of uploaded documents.
- Responsive design across devices.
- Audit trail for registrations, uploads, item assignments, and updates.
- Data model that supports one guardian record linked to multiple dependent records.

Resource allocation and collection workflow:

The system should allow administrators to log physical items assigned to each dependent, either before or during the collection date. For example, if a child requires ten items and only five pencils are available, the administrator

should be able to assign five pencils to that child in the system. That allocation should be recorded against the child's linked record and updated when the items are collected. The system should reflect whether items are partially assigned, fully assigned, or collected.

Data and ID handling:

When a submission is completed successfully, the system should write the record to the THA database and generate a unique THA ID. The uploaded book list should remain linked to the registrant's record so administrators can review the requested items and assess needs individually. Any physical resources assigned should also be logged against that record and updated when collected. If a guardian submits multiple dependents, each dependent should be stored as a separate linked record under the same application.

Operational notes:

- Uploaded files should be accessible only to authorized administrators.
- The system should support review by guardian, dependent, school, or resource category.
- The portal should allow reporting on requested items versus allocated items.
- The structure should remain scalable for future distribution or follow-up workflows.
- A parent or guardian should be able to complete one application for multiple dependents instead of submitting separate applications for each child.

Dependencies:

- DNS and hosting setup.
- Access to the THA database or integration endpoint.
- Finalized registration requirements.
- Approved branding and copy.
- Secure file storage or document repository.

Appendix - School Listing for School Dropdown

N.B. Proposed School Data Handling:

The school selection field will function as a categorized dropdown menu organized by academic level. For institutions not currently listed, the portal must allow manual entry of the school name and physical address. These new entries will undergo internal administrative verification before being formally integrated into the master dropdown selection list.

Primary / middle schools

- Belle Garden Anglican Primary School.
- Bethesda Government Primary School.
- Black Rock Government Primary School.
- Bon Accord Government Primary School.
- Buccoo Government Primary School.
- Castara Government Primary School.
- Charlotteville Methodist Primary School.
- Delaford Anglican Primary School.
- Delaford Roman Catholic Primary School.
- Des Vignes Road Government Primary School.
- Diamond Vale Government Primary School.
- Ebenezer Methodist Primary School.
- Goodwood Methodist Primary School.
- Golden Lane Government Primary School.
- Happy Haven / Tobago School for the Deaf.
- Hope Anglican Primary School.
- Lambeau Anglican Primary School.
- L'Anse Fourmi Government Primary School.
- Mason Hall Government Primary School.
- Montgomery Government Primary School.
- Moriah Government Primary School.

- Mt St George Methodist Primary School.
- Parlatuvier Anglican Primary School.
- Patience Hill Government Primary School.
- Pembroke Anglican Primary School.
- Pentecostal Light & Life Foundation.
